

HOW TO USE THE LITTERSTOPPER APP

Help us eliminate ocean litter, anytime, anywhere.

Step Three: Select 'Begin Without Timer' and ensure the date displayed is the day of your clean.

Next, tell us where you're picking up litter. This can be a street name, or the name and location of a beach or other area you're helping us clean. Please include your state with your location. You can ignore the next four fields (they're not as useful for us).

Select the type of area you're cleaning from the dropdown menu at the bottom of the list. This may be a beach, a park, a street, or anywhere else. Simply select the option closest in description.

Then scroll down to select the type of clean you'll be helping us with. We have a few options.

NO SORTING, CLEAN ONLY: This is the best option if you are picking up litter casually (e.g. taking the dog for a walk, or on your commute) and do not intend to sort the litter you find.

FULL AUDIT: Select if you're committed to cleaning an area, collecting the litter as you go, and then sorting the litter at the end. This is helpful for our data collecting. At the end of your clean, lay out all items you've found to take a photo and then track each individual item found.

BEGIN YOUR CLEAN

Step 1: Open up the Litter Stopper app and select 'Start Clean'.

Next, select 'Registered Organization' from the first menu.

Step 2: To help us collect data based off your clean up, select 'Conservation Volunteers Australia' as your organization on the first screen.

Then select 'CVA' again on the following screen to register your clean up with us.

FULL AUDIT

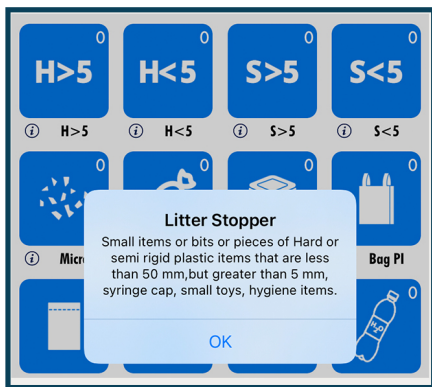

Help us collect data so we can eliminate litter at the source.

FOR A FULL AUDIT:

Collecting the litter you find in a bag as you go, tap on the icon that best represents each item as you complete your clean.

Small pieces of hard plastic are represented by H>5 (larger than 50mm) and H<5 (smaller than 50mm). This also applies to soft plastics (S>5 and S<5). Anything smaller than 5mm is considered a microplastic.

Add Note (if desired)

Add Item

Remove Item

Pause Collection

Finish Collection

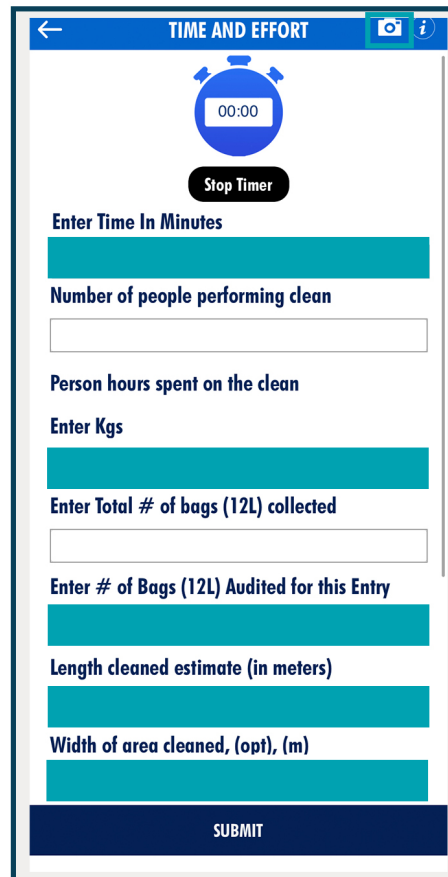

More information: To know more about each litter type, tap the small 'i' icon underneath the left side of each item.

Add or remove: To remove an item, scroll down and tap 'remove item', then tap the item you wish to subtract. Tap 'add item' again to continue your clean.

When complete, tap 'Finish collection' and complete the following steps. You're nearly there!

NO SORT, CLEAN ONLY

Whether you've completed a full audit, or have helped out by completing a clean only, follow these steps.

Next Clean Date (opt)

Press to Add Clean Location

SUBMIT

FOR NO SORT, CLEAN ONLY OR TO COMPLETE A FULL AUDIT:

Take a photo of any litter you've gathered, or photos of litter you have taken during your clean, then click the camera icon in the top right corner to add them to your clean.

Ignore the 'stop timer' function and other fields.

Please enter the number of people who have performed the clean. If you have collected your litter in a bag, please let us know roughly how many bags, or the approximate weight of what you have collected.

Add your clean location: Scroll down and select 'Add Clean Location'. A map will appear and you may receive a message about your location settings. You do not have to change your location settings to use the Litter Stopper app so select 'close', then press the blue 'Use My Current Location' button. The app will only record your location for this clean and will be used in CVA's data collection.

AND YOU'RE DONE!

Thanks for helping us to revive our waterways and work to eliminate ocean litter at its source.
